

**Linedraw**

**EQUIPMENT**

Chalkboard or whiteboard or flipchart.  
Paper & pencil for each student.

**BEFORE**

None.

**AFTER**

The **BrainBites** activity "[Silhouettes](#)" is a similar activity.

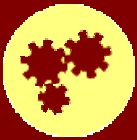

**DESCRIPTION**

Many people claim that they "cannot draw for toffees". This activity is aimed at helping students recognise the basic form of common everyday objects.

The teacher writes a list of objects on the board (3 or 4 should be sufficient). (See suggestions below.)

The challenge to the students is to draw each of the objects on the list (in any order) - using only **10 straight lines** (or less) for each. The lines may be any length and they may cross over.

The teacher may impose a time-limit (of 4 or 5 minutes) or make the activity competitive.
